PREFACE

With the substantial increase in the number of horses at Stud in India, the need for a Stallion Register has been keenly felt, and it is hoped that this Volume, containing the tabulated pedigrees and performances of one hundred and sixty-three stallions, will prove helpful to Breeders and all others interested in the industry.

It must be pointed out, however, that all the horses included in this Volume cannot claim eligibility to the General Stud Book.

The kind assistance of Breeders in compiling this Volume is thankfully acknowledged and it is requested that those concerned will be good enough to examine the records of their own Stallions etc. and will please notify any inaccuracies they may observe in order that they may be corrected.
